

Ancestor statistics of Fink, Eric Mitchell

Table of contents

Information summary.....	1
Generations table.....	2
Consanguinity table.....	3

Information summary

- Root individual: **Fink, Eric Mitchell (°4 Jul 1962 +) (I1)**
- Number of generations of ancestors covered: 10
- Coverage of 100% up to generation 5
- Implex factor at generation 10: **3.41%** (percentage of duplicate ancestors).
- Coefficient of consanguinity (between 0 and 1): **0.000000**
- Number of consanguineous ancestors: 1

Definitions:

- *Coverage factor is the ratio of known ancestors over theoretical number of ancestors.*
- *Implex factor is the ratio of duplicated ancestors over known ones.*
- *Coefficient of consanguinity is the degree to which the parents of an individual are related to eachother and share common ancestors. It also expresses the probability that the two allele genes that an individual has at a locus are identical.*

Generations table

Gen	Theoretical (t)	Known (k)	% (k/t)	Cumul Known (c=s(k))	% (c/s(t))	Duplicates (d)	Implex (s(d)/c)
1	1	1	100.0%	1	100.0%	0	0.0%
2	2	2	100.0%	3	100.0%	0	0.0%
3	4	4	100.0%	7	100.0%	0	0.0%
4	8	8	100.0%	15	100.0%	0	0.0%
5	16	16	100.0%	31	100.0%	0	0.0%
6	32	22	68.75%	53	84.12%	0	0.0%
7	64	28	43.75%	81	63.77%	2	2.46%
8	128	27	21.09%	108	42.35%	2	3.7%
9	256	7	2.73%	115	22.5%	0	3.47%
10	512	2	0.39%	117	11.43%	0	3.41%

List of duplicate ancestors

Only listing the most recent ones out of 4

- Generation 7
 - **Fink, Michael (°abt 1781 +31 Oct 1863) (I59)**
 - **Fleischer, Sara (°abt 1785 +) (I60)**

Consanguinity table

Listing all 1 consanguineous individuals

Ger	Individual	Coefficien	Related parents	Relationsh degree	Common ancestor families to parents
4	Fink, Richard Kobias (°1 Apr 1916 +21 Nov 1966) (I4) 	0.015625	Fink, Emil H (°6 Nov 1890 +20 May 1959) (I45) · Fink, Ida (°13 Feb 1890 +11 Mar 1950) (I8)	3	Fink, Michael (°abt 1781 +31 Oct 1863) x Fleischer, Sara (°abt 1785 +) (F146)

Definitions:
· The relationship degree between the parents is the number of generations separating each parent (degree father/degree mother) from their common ancestor family. Parents can have more than one common ancestor family. Ancestors families are part of the duplicate ancestors listed above.
